DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-16 and 18-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Hertrampf (U.S. 6,021,912). Hertrampf teaches a screw closure 1 having a top plate portion 3, and a substantially cylindrical peripheral portion 12. The cylindrical bead of the peripheral portion is located directly above lead line 13. The sealing strip is element 9, and it is considered “deformable” to the degree set forth in the claim because it can be deformed if the appropriate amount of pressure is applied in a horizontally direction. Element 4 is considered the sealing olive. The reduced thickness area is shown at lead line 8.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 17 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hertrampf in view of Dai (U.S. 6,044,995). Hertrampf discloses the claimed invention except for the tamper band. Dai teaches that it is known to provide a closure with a tamper band (see element 40). It would have been

obvious to one having ordinary skill in the art at the time the invention was made to provide the closure of Hertrampf with a tamper band, as taught by Dai, in order to indicate whether the container has been previously opened..

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for the sealing olive and/or sealing strip.

6. THIS ACTION IS NON-FINAL.

7. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703)305-3579. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a USPTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into group 3720 will be promptly forwarded to the examiner.
